Index for The Computer Journal, Volume 25

1. Index of Titles of Papers, Books Reviewed, etc.

Advances in Data Processing Management—Volume 1 (review). 400
An aid to pattern recognition. 37
An aid to hidden surface removal in real time CGI systems. 429
An algorithm for unbiased random sampling. 45
Algorithms supplement. 278
Analysis and optimization of set expressions. 340
APL 80 (review). 337
The application of functional dependency theory to relational databases. 68
Applications of redundant number representations to decimal arithmetic. 471
Automatic contouring from scattered data points. 7
Automatic report formatting from a report specimen. 242

BASIC-Pack Statistics Programs for Small Computers (review). 396
Binary-relational storage structures. 358
Binary search trees (*short note*). 158
The BLEND system: programme for the study of some 'electronic journals'. 161
Block sorting of a large file in external storage, by a 2-component key. 327
Bresenham's algorithm with run line coding shortcut. 114

The case for distributed decision making systems. 148
Combinatorial Methods of Discrete Programming (review). 160
Combining data flow and control flow computing. 207
A comment on the decomposition of flowchart schemata. 393
A comparison of Pascal and Ada. 248
Computer Networks (review). 337
Computer precedence functions (*short note*). 397
Computer Scheduling of Public Transport (review). 396
Computing the chromatic index of Steiner triple systems. 338
A control structure for a variable number of nested loops. 48
Cryptography: A Primer (review). 400

Data analysis and system design by entity-relationship modelling: a practical example. 401
Data Base Administration (review). 160
Database Security and Integrity (review). 400
A 'database' subsystem for BCPL. 448
Data Structures (review). 492
Decomposition of flowchart schemata (*comment and corres.*). 393, 495
The determination of the optimum database maintenance points. 126
A dialogue system to teach database concepts. 135
Digital Control Using Microprocessors (review). 496
DOPLs: a new style of programming. 176
Dynamic hashing schemes. 478

Effective Data Base Design (review). 83
Efficient storage management for functional languages. 264
Elements of Computer Process Control (review). 396
An End-User's Guide to Data Base (review). 400
Entity life cycle models and their applicability to information systems development life cycles. 307
Error recovery with attribute grammars. 331
Eurographics 80 (review). 129
Expected worst-case performance of hash files. 347
Experiments on the mechanization of game-learning. 2—rule-based learning and the human window. 105
The explicit quad tree as a structure for computer graphics. 235

Fault Tolerance: Principles and Practice (review). 400
A file index for document storage and retrieval utilizing descriptor fragments. 2
Fixed point solutions of recursive operations on Boolean arrays. 231
FORTRAN for Business Students: A Programmed Instruction Approach (review). 492
Functional programs for generating permutations. 257
Fundamentals of Computer Logic (review). 287
Fundamentals of Systems Analysis, second edition (review). 83

Implementation of BEDSOCS: an interactive simulation language (*corres.*). 399
An improved optimal-fit procedure for dynamic storage allocation. 199
Incremental line compaction. 116
An inventory of software packages for information work. 306
Inversion of the Laplace transform (*algorithms supplement*). 278
Invitation to PASCAL (review). 496

Jumping to some purpose (*corres.*). 286, 495

Key space compression and hashing in PRECI. 486

A modified bisection algorithm for the determination of the eigenvalues of a symmetric quindiagonal matrix. Short Note. 493
MU5 descriptors (*corres.*). 399

The necessity of publishing programs. 61
A note on computing precedence functions. 397
The number of states of a dynamic storage allocation system. 388

On a class of allocation strategies inducing bounded delays only. 52
On estimating the cost of accessing records in blocked database organizations. 368
On synchronizing readers and writers with semaphores. 121
On testing non-testable programs. 465
On the inclusion and placement of documentation graphics in computer typesetting (*corres.*). 272
On the process of bisection to calculate the eigenvalues of quindiagonal matrices (*corres.*). 44
On the static access-control mechanism in concurrent Pascal. 17
Operating System Elements—A User Perspective (review). 422
Optimal evaluation of queries. 239
Optimal fit of arbitrary sized segments. 32

Packing rectangular pieces—a heuristic approach. 353
Parallel algorithms for the iterative solution to linear systems. 56
Participation in information systems (*tutorial*). 283
Performance comparison of I/O access disciplines for transaction-processing systems. 74
Performance measurements—a practical example from a German university computer centre. 188
Permutation generation on vector processors. 423
Petri Net Theory and the Modelling Systems (review). 129
The possible impact of minicomputers and microprocessors mainframe computer manufacturers (*corres.*). 286
The preparation of guidelines for portable programming in high-level languages. 375
Practical Reliability Engineering (review). 337
Principles of Programming Languages (review). 287
Priority and queuing specification in 'distributed processes'. 34
A program for generating word squares (*corres.*). 44
Programming in Pascal with Pascal/1000 (review). 160
The programming language BPL. 289
Programming Language Translation (review). 492
Protocols and Techniques for Data Communication Networks (review). 494

Quantitative Methods for Business Decisions (review). 494
Quasi-equifrequent group generation and evaluation. 183
QUICKSHUNT—a distributive sorting algorithm. 102

Real-Time Programming—Neglected Topics (review). 494
A representation approach to the Tower of Hanoi problem. 442
Right-to-left code generation for arithmetic expression. 316
The rotating bus as a basis for interprocess communication in distributed systems. 22

Selected Readings in Computer-Based Learning (review). 287
Semantic specification using two-level grammars: labels and GOTO statements. 63
A simple model for the performance analysis of disc storage fragmentation. 193
Simplified Accounting for the Computer Industry (review). 337
Simulation of discrete systems using GPSS—FORTRAN. 84
Single versus double buffering in constrained merging. 227
A soft-edged character set and its derivation. 140
Software development for microcomputer data processing systems. 253
Software Metrics (review). 400
Sparsely filled dynamically allocated memory. 159
STATLIB: A Statistical Computing Library (review). 287
A survey of the literature of cluster analysis. 130
A systematic and practical approach to the definition of data. 410
Systems Analysis and Design for Computer Application (review). 422

A taxonomy of current approaches to systems analysis. 12
Telematic Society (review). 422
The theory and practice of constructing an optimal polyphase sort. 93
A topology reconfiguration mechanism for distributed computer systems. 87
Triodic logic and its use in structured program design. 218
Tutorial. Participation in Decision Making. 283

Unravelling unstructured programs. 379
Updating an inverted index—a performance comparison of two techniques. 169

VLSI: machine architecture and very high level languages (*workshop report*). 153

2. Index of Authors and Other Contributors

Allen, F. W. 2
Aníbal, O. C. and Zanette, S. I. 44
Arora, A. K. *see* Carlson, C. R.

Barlow, R. H. and Evans, D. J. 56
Barron, D. W. *see* Bishop, J. M.
Bell, D. A. and Deen, S. M.
Bengtsson, B-E. 353
Bishop, J. M. and Barron, D. W. 399
Blake, A. 231

3. Index of Topics, etc.

Accounting, computer industry (review). 337
Ada. 248, 375
ALGOL (review). 287, 422
ALGOL-60. 61
ALGOL-68. 32
ALGOL-68R. 11
Algorithms:
  Bell's. 397
  bin packing problem. 353
  bit vector minimum length. 340
  branch-and-bound. 338

Bresenham's. 114
eigenvalues of symmetric quindiagonal matrix. 493
euclid's. 114
for unbiased random sampling. 45
inversion of Laplace transform. 278
matrix reduction. 434
necessity for publishing programs. 61
non-radix distributive sorting. 102
optimal-fit procedure. 205
parallel. 56
parsing. 331
permutation generation. 258, 423
polyphase sort. 93
precedence functions. 397
revised optimal-fit. 205
sieve:
DOPL version. 178
IOPL version. 179
topology reconfiguration. 87
Tower of Hanoi. 442
Allocation problems:
heuristic approach. 353
three-dimensional. 353
Alphabet listing in hexadecimal. 143
AMY-2 digital analog. 40
APL (review). 287, 337
Arithmetic expressions, right-to-left code generation for. 316
Artificial intelligence:
dialogue systems. 136
pattern recognition. 42
ASDAS database management system. 365, 366
Assembly languages. 48, 316
Attribute grammars, error recovery with. 331
Automatic contouring. 7

Bachman diagrams. 315
BASIC. 48, 254, 256, 289, 396
BC TRY. 132
BCPL. 448
BEDSOCS. 399
Bell's algorithm. 397
Best-fit placement policy. 32
Best-fit procedures. 202
Bin packing problems. 353
Binary arithmetic unit. 471
Binary-relational data model. 360
Binary-relational storage structures. 358
advantages and disadvantages. 359
definition. 358
review of implementations and suggestions for alternative approaches. 365
survey of implementations and applications. 361
Binary-relational systems. 362
Binary search trees. 158
Birmingham and Loughborough Electronic Network Development (BLEND). 161
Bit map indexes. 2
Bit-string representation in Tower of Hanoi problem. 442
bit vectors. 340
BLEND system. 161
Block sorting by 2-component key. 327
Boolean arrays. 231
Boolean expression queries. 239
BOXES program. 105
BPL:
commands. 298
constants. 291
definition of. 289
examples. 300
expressions. 293
procedures and functions. 297
reference to data items. 292
statements. 294
statements and commands. 289
syntax diagrams. 301
type definitions. 291
variable and array declarations. 292
variables, types and identifiers. 290
Breaks, triodic logic. 223
Bresenham's algorithm. 114
Buffering:
in constrained merging. 227
single versus double. 227

Characters, soft-edged set. 140
Checkland Model. 15
Chi-squared analysis of measurement data. 198
Chromatic index of Steiner triple systems. 338
Class of allocation strategies. 52
Client contract entity. 312
Clip. 231
CLUSTAN. 132
Cluster analysis:
computer programs. 132
literature survey. 130
COBAL. 242, 287
Combinatorial methods of discrete programming (review). 160
Compilers. 254, 316
Compiling (review). 492
Computer induction. 105
friendly and unfriendly. 109
Computer industry, accounting (review). 337
Computer Generated Image (CGI) systems. 429
Computer graphics. 235
Computer linking with no control lines. 31
Computer logic, fundamentals of (review). 287
Computer networks (review). 337
Computer program blocks, triodic. 218
Computer programming:
combinatorial methods (review). 160
combining data flow and control flow computing. 207
microcomputer. 253
real-time (review). 494
Computer programs. 264
database teaching. 135
cluster analysis. 132
numerical algorithms. 61
permutation generation. 257
portability of high-level languages. 375
testing of non-testable. 465
unravelling of unstructured. 379
word square generation. 44
Computer typesetting, documentation graphics in. 272
Concurrent Pascal. 17
alternative schemes for static access-control. 20
environment specification. 19
static access control. 17
Contour tracing. 7
Contouring, automatic. 7
Contouring algorithm. 7
Control flow computing:
models of program organization. 208
multi-thread. 207
Costs, query processing in database. 368
Cryptography (review). 400

Data analysis, entity-relationship modelling. 401
Data communication networks, protocols and techniques for (review). 494
Data elements:
controlled vocabulary. 414
definition of. 410
formal definitions. 413, 416
library retrieval difficulties. 412
terminology problem. 420
type classification method. 413, 414
Data flow computation and multi-thread control flow computation. 207
Data processing:
microcomputer software development. 253
program generators. 255
Data processing management (review). 400
Data storage. 213
Data structures (review). 492
Data structuring, dynamic. 448
Database management systems. 69, 358
Databases:
administration (review). 160
cost of accessing records. 368
document descriptions. 2
effective design (review). 83
end-user's guide. 400
functional dependency theory. 68
maintenance of arbitrary structures. 128
optimum maintenance points. 126
subsystem for BCPL. 448
teaching program. 135
see also Relational databases
Deadlock phenomena. 52

Decimal arithmetic unit. 471
Decision making. 283
  distributed systems. 148
  quantitative methods (review). 494
Decision support system (DSS). 148
Decision table. 240
Decision tree. 239
Dialogue systems, database concepts. 135
Dining Philosophers' Problem. 52
Diode. 218
Directory search procedure. 3
Disc storage fragmentation, performance analysis model. 193
Discrete systems, simulation of. 84
Display vector handling. 266
Distributed Decision Making (DDM). 148
Distributed processes, priority and queuing specification. 34
Distributed systems:
  decision making. 148
  interprocess communication in. 22
  topology reconfiguration systems. 87
Distributive sorting problems. 102
Document storage and retrieval. 2
Documentation graphics in computer typesetting. 272
DOPL programming language. 176
Dynamic hashing schemes. 478
Dynamic storage allocation. *See* Storage allocation

Eigenvalues:
  of quindiagonal matrices. 44
  symmetric quindiagonal matrix. 493
Electronic journals. 161
Entity behaviour modelling. 310
Entity life cycle analysis. 310
Entity life cycle models. 307
Entity-relationship modelling. 401
Erase & Enter technique. 267, 268, 269, 271
Error-handling, triodic logic. 223
Error recovery with attribute grammars. 331
Equivalence classes. 390
EUCLID. 345
Euclid's algorithm. 114
Eurographics 80 Conference and Exhibition (review). 129

FACT machine. 364, 366
Fault tolerance, principles and practice (review). 400
Filtered file index (FFI). 2
First-fit placement policy. 32
First-fit procedures. 202
First-fit simulation studies. 32
Fixed point analysis. 232
Fixed point solutions. 231
Floating-point arithmetic. 475
Flow charts:
  decomposition. 393, 495
  isolation of unstructured subflowcharts. 394
Flynn's Problem No. 5. 385
FOREMAN. 362
FORTRAN. 48, 57, 61, 84, 132, 316, 375, 492
FREDDY robot. 105
Functional dependency theory. 68
Functional languages, problem solving. 264
Functional programs for generating permutations. 257
Functional system, implementation. 265

Game-learning, mechanization of. 105
Gauss-Jacobi method. 56
Gauss-Seidel method. 56
GOTO, reasoning against use of. 286, 495
GPCP (General Purpose Contouring Program). 7
GPSS-FORTRAN. 84
Graphics packages. 273
Gray codes in Tower of Hanoi problem. 445
GROPER language. 273
Group generation and evaluation, quasi-equifrequent. 183

Harrison's substring test. 3
Hash slots, allocation of tuples to. 491
Hash trees method. 488
Hashed files:
  organization. 478
  worst-case performance. 347
Hashing function. 488
Hashing methods:
  dynamic schemes. 478
  external. 486
Hidden surface removal in real-time CGI system. 429
Human window. 110

IBM System 3 Model 10. 328
IBM System/32. 286
ID3 program. 110
Identifiers. 415
Image array processors. 231
Incremental line compaction. 116
Index, inverted. *See* Inverted index updating

Modelling systems (review). 129
Modems, electronic journals. 167
MOTOROLA PIA 6820. 31
MU5 descriptors. 399

NATIONAL SC/MP microprocessor. 31
NDPCAL. 135
Nested function environment. 267
Nesting methods. 353

Operating system elements (review). 422
Optimal-fit procedure:
arbitrary sized segments. 32
comparison with rounding-up schemes. 202
evaluation of. 200
for dynamic storage allocation. 199
implementation. 202
revised. 201
simulation experiments. 202
Optimal information structures. 183
Optimal placement policy. 32
Oracle assumption. 465

Packet communication organization. 213
Packing of rectangular pieces, heuristic approach. 353
Parallel algorithms. 56
Parallel array processors. 231
Parametrized generators. 254
Parsing algorithm for attribute grammars. 331
Partial expansion. 483
Participation:
in decision-making. 283
in design process. 285
new mode of. 285
purpose of. 283
PASCAL. 160, 248, 287, 289, 340, 464, 492, 496
see also Concurrent Pascal
PASCAL/1000 (review). 160
Pattern recognition. 37
associative memory system. 37
basic hardware. 38
basic hardware operation mode. 39
input detectors. 38
multi-input system. 42
system description. 37
system output mode. 42
Performance analysis, disc storage fragmentation model. 193
Performance measurements, German University Computing Centres. 188
Permutation generation. 257, 423
Petri net theory (review). 129
Petri nets. 310
Picture definition and placement within text. 272
Picture processing, quad tree. 235
PLATO. 135
Polish notation. 316
Polyphase sort:
dispersion difficulties. 99
dispersion problems. 96
dummy strings and merge numbers. 94
elimination of rewind time. 100
optical construction. 93
read-backward. 97, 99
read-forward. 93, 95
Portability of high-level languages. 375
Postfix notation. 316
Postfix string. 316
Precedence functions algorithm. 397
PRECI (prototype of a relational canonical model with local interfaces). 486
Primary key retrieval. 478
Priority specification in distributed processes. 35
Probability distribution. 476
Problem solving, functional languages. 264
